CONTENTS OF VOL. 79 Nos 1–12

NUMBER 1—JANUARY

Photoemission from $YbInCu_4$: testing the single impurity model
J. J. Joyce, A. J. Arko, J. L. Sarrao, K. S. Graham, Z. Fisk and P. S. Riseborough 1

Simulating adsorbed layers of surfactant mixtures at an oil–water interface
M. in het Panhuis and S. Karaborni 9

Non-perturbative approach to nearly antiferromagnetic Fermi liquids
P. Monthoux 15

A first-principles Hartree–Fock interpretation of the X-ray oxygen K-edge spectrum of haematite (α-Fe_2O_3)
W. C. Mackrodt, F. Jollet and M. Gautier-Soyer 25

Phonon scattering: how does it affect the image contrast in high-resolution transmission electron microscopy?
Z. L. Wang 37

Transient photoconductivity analysis using multiple trapping for rectangular and linear distributions of localized states
S. Grabtchak and M. Cocivera 49

Small-polaron variable-range hopping in quasi-two-dimensional materials: application to $PrBa_2Cu_{3-x}Ga_xO_{7-y}$
R. B. Thompson and M. Singh 63

Retarded Green's function for an electron in a parabolic quantum dot subject to a constant uniform magnetic field and an electric field of arbitrary time dependence and orientation
V. Fessatidis, N. J. M. Horing and K. Sabeeh 77

Surface oxidation of Al–Cu–Fe alloys: a comparison of quasicrystalline and crystalline phases
P. J. Pinhero, J. W. Anderegg, D. J. Sordelet, M. F. Besser and P. A. Thiel 91

Fermi-liquid renormalization in the superconducting state of UBe_{13}
A. P. Ramirez, C. M. Varma, Z. Fisk and J. L. Smith 111

Competing interactions and the isotope effect in colossal magnetoresistance materials
A. Bussmann-Holder and A. R. Bishop 119

Ferromagnetism at 19 K in a bimetallic compound based on 1,2-propanediamine ligand
E. V. K. Suresh Kumar, S. A. Chavan, A. K. Sra, M. K. Bhide, M. D. Sastry, R. Ganguly, H. B. Singh and J. V. Yakhmi....127

Compositional and structural studies of amorphous silicon–nitrogen alloys deposited at room temperature using a sputtering-type electron cyclotron resonance microwave plasma
Y. C. Liu, K. Furukawa, H. Nakashima, Y. Kashiwazaki, D. W. Gao, K. Uchino, K. Muraoka and H. Tsuzuki....137

Atom–atom correlation in the presence of strong THz phonon excitation
P. L. Hagelstein....149

Heterophase quasicrystalline interfaces and their characterization
R. K. Mandal....157

Microstructure identification of an interfacial phase in a melt-spun Hf–Ni nanocrystalline alloy
R. Lück, Z. F. Dong, M. Scheffer, I. Bakonyi and K. Lu....163

Splitting of angular momentum energy levels in a tetrahedral crystal field
X. Chen, S. Y. Ren and J. D. Dow....177

NUMBER 2—FEBRUARY

Electronic structure calculations of Al–Cu alloys: comparison with experimental results on Hume-Rothery phases
V. Fournée, I. Mazin, D. A. Papaconstantopoulos and E. Belin-Ferré....205

The kinetics of the photo-induced solid-state chemical reaction in Ag/$As_{33}S_{67}$ bilayers and its reaction products
T. Wagner, E. Márquez, J. Fernández-Pena, J. M. González-Leal, P. J. S. Ewen and S. O. Kasap....223

X-ray photoelectron spectroscopy analysis of bulk Pd–Ni–P metallic glasses
F. M. Alamgir, H. Jain, A. C. Miller, D. B. Williams and R. B. Schwarz....239

Photo-induced structural changes in obliquely deposited arsenic-based amorphous chalcogenides: a model for photostructural changes
Y. Kuzukawa, A. Ganjoo, K. Shimakawa and Y. Ikeda....249

Exact results on void growth in a model of electromigration
R. M. Bradley, M. Mahadevan and K. Wu....257

***Ab-initio* study of the adsorption of Cu on Pt(100)**
D. Vogtenhuber....269

Advances in the development of high-temperature superconducting Bi-2223/Ag pancake coils for electric power applications
N. V. Vo....281

Thermally enhanced quantum efficiency in hydrogenated amorphous silicon p–i–n photodiodes studied by intensity-modulated photocurrent spectroscopy
D. Vanmaekelbergh, J. van de Lagemaat, R. E. I. Schropp and F. Cardon 291

Influence of the cationic substitution on the mechanism of structural phase transitions in $RbCaF_3$ and $KCaF_3$: study of a typical mixed crystal $Rb_{0.68}K_{0.32}CaF_3$
Ph. Daniel, J. Toulouse, M. Rousseau, A. Désert and A. Ratuszna 319

Nonlinear Frenkel and Poole effects
V. I. Kol'dyaev 331

The doping routes and distribution of holes in layered cuprates: a novel bond-valence approach
M. Karppinen and H. Yamauchi 343

Anomalous two-phonon absorption and copper-assisted diamond nucleation in amorphous carbon
V. I. Ivanov-Omskii 367

Is the chemical threshold in certain chalcogenide glasses responsible for the threshold at the mean coordination number of approximately 2.7?
L. Tichý and H. Tichá 373

NUMBER 3—MARCH

Molecular orientation in lipid bilayers
J. J. Ramsden 381

Effect of hydrogen dilution on the optical properties of hydrogenated amorphous silicon prepared by plasma deposition
M. Yamaguchi and K. Morigaki 387

Variations in the properties of ceramic nano-clusters
R. W. Grimes 407

On the growth of decagonal Al–Ni–Co quasicrystals from the ternary melt
I. R. Fisher, M. J. Kramer, Z. Islam, A. R. Ross, A. Kracher, T. Wiener, M. J. Sailer, A. I. Goldman and P. C. Canfield 425

Substitution effects on the relaxor properties of lead magnesium niobate ceramics
O. Bidault, E. Husson and P. Gaucher 435

On the mechanism of the paramagnetic-to-ferromagnetic transition in Fe–Al
Y. Yang, I. Baker and P. Martin 449

One-dimensional hopping transport in a columnar discotic liquid-crystalline glass
I. Bleyl, C. Erdelen, H.-W. Schmidt and D. Haarer 463

Nanoscale size effects on the plasmon response of diamond powder
R. P. Fehlhaber and L. A. Bursill 477

Level statistics and localization in a two-dimensional quantum percolation problem
M. Letz and K. Ziegler 491

Co-sputtering C–Cu thin film synthesis: microstructural study of copper precipitates encapsulated into a carbon matrix
T. Cabioc'h, A. Naudon, M. Jaouen, D. Thiaudière and D. Babonneau 501

Correlation between electric force microscopy and scanning electron microscopy for the characterization of percolative conduction in electronic devices
A. Alessandrini, G. Valdrè, B. Morten, S. Piccinini and M. Prudenziati .517

Is there an ideal phase diagram for high-temperature superconductors?
J. C. Phillips 527

Comment on the analysis of magnetoreflectance experiments at the E_1 edge of InSb and other materials
S. O. Sari 537

NUMBER 4—APRIL

Effect of plastic deformation on the transport phenomena in $Pb_{0.95}Sn_{0.05}Se$ single crystals
K. Z. Papazian and R. A. Vardanian 541

The reversible enthalpy relaxation in glassy metal alloys and polymers
J. G. Shim and G. P. Johari 565

Magnetic relaxation of hydrogen in RE_2Fe_{17} compounds (RE = Dy, Gd, Y, Nd or Sm)
N. Mommer, H. Reule, M. Hirscher and H. Kronmüller 585

On the growth of polycrystalline diamond on transition metals by microwave-plasma-assisted chemical vapour deposition
K. Mallika, T. R. Ramamohan, K. Jagannadham and R. Komanduri 593

Molecular dynamics simulations of sequential deposition of metallic superlattices
A. M. Mazzone 625

Plasmons at shock fronts
J. J. Gilman 643

Metastable solid metallic hydrogen
W. J. Nellis 655

NUMBER 5—MAY

High-pressure ultrasonic study of monocrystalline Cr in the antiferromagnetic and paramagnetic phases
R. D. Metcalfe, G. A. Saunders, M. Cankurtaran and H. L. Alberts.....663

From heavy fermions to random-localized-site behaviour via Anderson localization
B. R. Cooper, O. Vogt, Q.-G. Sheng and Y.-L. Lin.....683

Three-dimensional grain growth: a vertex dynamics simulation
D. Weygand, Y. Bréchet, J. Lépinoux and W. Gust.....703

Nanolevel studies of lattice defects and electronic structure of $YBa_2Cu_3O_7$ single crystals doped with praseodymium: destruction of superconductivity
A. V. Narlikar, A. Gupta, S. B. Samanta, C. Chen, Y. Hu, F. Wondre, B. M. Wanklyn and J. W. Hodby.....717

Foams out of stable equilibrium: cell elongation and side swapping
F. Elias, C. Flament, J. A. Glazier, F. Graner and Y. Jiang.....729

Vibrational entropies of alloying and compound formation: experimental trends
P. D. Bogdanoff and B. Fultz.....753

Superconductivity of the ternary ruthenium compounds HfRuP and ZrRuX (X = P, As, Si or Ge) prepared at a high pressure
I. Shirotani, K. Tachi, Y. Konno, S. Todo and T. Yagi.....767

Effects of pre-hydrogenation on the relaxation and bandgap variation of thermally nanocrystallized silicon layers
A. Achiq, R. Rizk, R. Madelon, F. Gourbilleau and P. Voivenel.....777

Plasmons as the primary mechanism of ion-induced modifications in polymers
J. P. Moliton, C. Jussiaux-Devilder, T. Trigaud, R. Lazzaroni, J. L. Bredas, S. Galaup, Y. Kihn and J. Sevely.....793

Exact solution of the non-crossing approximation for the strong coupling limit of the half-filled Hubbard model
P. S. Riseborough.....817

NUMBER 6—JUNE

Characteristics of $Au/PbZr_{0.52}Ti_{0.48}O_3/YBa_2Cu_3O_{7-\delta}$ capacitors fabricated on $LaAlO_3$ and Y_2O_3-stabilized ZrO_2 substrates during irradiation
J. Gao, L. Zheng, Z. Song, L. Wang, L. Yang, D. Zhu and C. Lin.....829

First-principles study of elastic and thermal properties of refractory carbides and nitrides
W. Wolf, R. Podloucky, T. Antretter and F. D. Fischer.....839

Wigner glass, spin liquids and the metal–insulator transition
S. Chakravarty, S. Kivelson, C. Nayak and K. Voelker 859

Monte Carlo study of short-range order and displacement effects in disordered CuAu
O. Malis, K. F. Ludwig Jr, D. L. Olmsted and B. Chakraborty 869

Analysis of the transition from dispersive to non-dispersive transport for photoconductivity transients
S. Grabtchak and M. Cocivera 881

Transmission electron microscopy study of epitaxial lanthanum–manganite thin films on $SrTiO_3$
K. Han and K. Yu-Zhang 897

Thermodynamic properties and lattice dynamics of silver at high pressure: a first-principles study
J. Xie, S. P. Chen, S. de Gironcoli and S. Baroni 911

Electron states of YAG probed by energy-loss near-edge spectrometry and *ab initio* calculations
M. A. Gülgün, W.-Y. Ching, Y.-N. Xu and M. Rühle 921

The mixed dynamic form factor for atomic core-level excitations in interferometric electron-energy-loss experiments
M. Nelhiebel, N. Luchier, P. Schorsch, P. Schattschneider and B. Jouffrey 941

NUMBER 7—JULY

Some aspects of machining with negative-rake tools simulating grinding: a molecular dynamics simulation approach
R. Komanduri, N. Chandrasekaran and L. M. Raff 955

Magnetic order in $La_{1-x}Sr_xCoO_3$: a macroscopic and microscopic study
V. G. Sathe, A. V. Pimpale and S. B. Roy 969

Thermodynamic properties of Ni_3Al and Cu_3Au as calculated with the tight-binding potential
H. B. Liu, Z. Q. Hu and G. Y. An 981

Electrical and optical properties of porphyrin monomer and its J-aggregate
A. Aziz, K. L. Narasimhan, N. Periasamy and N. C. Maiti 993

Optical studies on composite Langmuir–Blodgett films containing ytterbium bis-phthalocyanine
A. K. Ray, A. V. Nabok, A. K. Hassan, J. Silver, P. Marsh and T. Richardson 1005

Thermal conductivity and thermoelectric power of $CuIr_2S_4$ and $CuIr_2Se_4$ spinels
K. Balcerek, Cz. Marucha, R. Wawryk, T. Tyc, N. Matsumoto and S. Nagata 1021

Temperature dependence of the resistivity in Au–$YBa_2Cu_3O_x$ sintered composites
C. Lambert, J.-M. Debierre, G. Albinet and J. Marfaing 1029

Fermi surface properties and de Haas–van Alphen oscillation in both the normal and superconducting mixed states of URu_2Si_2
H. Ohkuni, Y. Inada, Y. Tokiwa, K. Sakurai, R. Settai, T. Honma, Y. Haga, E. Yamamoto, Y. Ōnuki, H. Yamagami, S. Takahashi and T. Yanagisawa 1045

Some electronic and metastability properties of a new nanostructured material: hydrogenated polymorphous silicon
R. Butté, R. Meaudre, M. Meaudre, S. Vignoli, C. Longeaud, J. P. Kleider and P. Roca i Cabarrocas 1079

NUMBER 8—AUGUST

A Luttinger's theorem revisited
B. Farid 1097

Structure and thermopower of solid solution nickelocuprates $La_{2-x}Sr_xCu_{1-y}NiO_4$
C.-J. Liu 1145

Effect of Ti doping on the transport properties of thick films of (Bi, Pb)–Sr–Ca–(Cu, Ti)–O-type glass–ceramic superconductors
H. K. Barik, S. Bhattacharya, S. Chatterjee, P. K. Pal and B. K. Chaudhuri 1161

Dielectric and conductivity relaxation in lead vanadate glass
S. Mandal and A. Ghosh 1175

$ErFe_2$–H_2 system
I. The interstitial-site occupancy by hydrogen atoms and model predictions
P. Raj, K. Shashikala, A. Sathyamoorthy, V. Siruguri and S. K. Paranjpe 1185

$ErFe_2$–H_2 system
II. Non-collinear magnetic ordering
K. Shashikala, P. Raj, A. Sathyamoorthy, T. V. Chandrasekhar Rao, V. Siruguri and S. K. Paranjpe 1195

Erbium-doped hydrogenated amorphous silicon prepared by dc sputtering
M. Kechouane, N. Beldi, O. Mouheb, T. Mohammed-Brahim, A. S. Barriere, H. L'Haridon and M. Gauneau 1205

Coarsening of a three-dimensional reconstructed foam under Surface Evolver
C. Monnereau, M. Vignes-Adler and N. Pittet 1213

NUMBER 9—SEPTEMBER

Walter D. Knight: A Special Issue to Celebrate His Eightieth Birthday

Preface 1223

Walter David Knight: an appreciation
E. L. Hahn, V. V. Kresin and J. H. Reynolds 1225

The Knight Shift
W. D. Knight 1231

Publications of Walter D. Knight 1239

Parallel paths
C. H. Townes 1245

Encounters with the Knight shift
N. Bloembergen 1247

Walter Knight
J. Friedel 1251

The Knight shift — a powerful probe of condensed-matter systems
C. P. Slichter 1253

Nuclear magnetic resonance in small particles of metals
S. Kobayashi 1263

Metallic quantum dots
M. Tinkham 1267

Surface plasmons in nanoclusters: elementary electronic excitations and their applications
F. Stietz and F. Träger 1281

Direct measurement of local field factors for second-harmonic generation from quantum dot Langmuir monolayers compressed through the metal–insulator transition
C. P. Collier, S. Henrichs and J. R. Heath 1299

'Soft landing' of size-selected clusters in chemically inert substrates
W. Harbich 1307

Electronic shell structure in clusters as reflected in mass abundance spectra
S. Bjørnholm and J. Borggreen 1321

Electronic effects in the production of small dianionic gold clusters by electron attachment on to stored Au_n^-, $n = 12$–28
L. Schweikhard, A. Herlert, S. Krückeberg, M. Vogel and C. Walther 1343

Reactions of size-selected metal cluster ions
Š. Vajda, T. Leisner, S. Wolf and L. H. Wöste 1353

Stern–Gerlach deflection of ferromagnetic cluster beams
A. Chatelain 1367

The spectroscopy and photophysics of isolated transition-metal clusters
M. B. Knickelbein 1379

Long-range polarization interactions of metal clusters
V. V. Kresin and C. Guet 1401

Statistical emission processes of clusters
K. Hansen 1413

Three attempts and one success in addressing the bandgap closure in mercury clusters
R. Busani, M. Folkers and O. Cheshnovsky 1427

Measurement of pick-up cross-sections of ^{4}He clusters: polar versus non-polar molecules
H. Hess, D. S. Larsen and A. A. Scheidemann 1437

Sound wave momentum and thermal expansion
T. E. Faber 1445

Reflective surfaces for cooler buildings and cities
M. Pomerantz, H. Akbari, P. Berdahl, S. J. Konopacki, H. Taha and A. H. Rosenfeld 1457

NUMBER 10—OCTOBER

Dopant sites and structure in high T_c layered cuprates
J. C. Phillips 1477

Simulation of nanoporous carbons: a chemically constrained structure
M. Acharya, M. S. Strano, J. P. Mathews, S. J. L. Billinge, V. Petkov, S. Subramoney and H. C. Foley 1499

Local structure of nanoporous carbons
V. Petkov, R. G. DiFrancesco, S. J. L. Billinge, M. Acharya and H. C. Foley 1519

Plasmon excitations in carbon nanotubes
T. Stöckli, Z. L. Wang, J.-M. Bonard, P. Stadelmann and A. Châtelain 1531

Coexistence of nanoscopic domains in synthetic membranes
G. Valdrè, A. Alessandrini, U. Muscatello, U. Valdrè and V. Vannini 1549

Oxygen-related anisotropic muonium centres in crystalline silicon
M. Schefzik, R. Scheuermann, L. Schimmele, A. Seeger, D. Herlach, O. Kormann, J. Major and A. Röck 1561

Spatial distribution of the electric current and field in atomic-scale conductors
T. N. Todorov 1577

Magnetic-field induced crossover from Efros–Shklovskii to Mott variable range hopping in Si:(P,B)
M. Iqbal, J. Galibert, J. Léotin, S. Waffenschmidt and H .v. Löhneysen 1591

Stability of a hard-sphere binary quasicrystal
H. M. Cataldo 1603

Interstitial carbon in copper: electronic and mechanical properties
D. E. Ellis, K. C. Mundim, D. Fuks, S. Dorfman and A. Berner 1615

Effects of structural defects on hole drift mobility in aryl-substituted polysilanes
S. Seki, Y. Yoshida, S. Tagawa, K. Asai, K. Ishigure, K. Furukawa, M. Fujiki and N. Matsumoto 1631

Influence of hydrogen on the structure and properties of tetrahedral amorphous carbon films obtained by the filtered cathodic vacuum arc technique
L. K. Cheah, X. Shi, E. Liu, B. K. Tay, J. R. Shi and Z. Sun 1647

The current equation in strong electric fields
E. Bringuier 1659

On the growth of icosahedral Al–Pd–Mn quasicrystals from the ternary melt
I. R. Fisher, M. J. Kramer, T. A. Wiener, Z. Islam, A. R. Ross, T. A. Lograsso, A. Kracher, A. I. Goldman and P. C. Canfield 1673

Compositional and structural properties of deuterated plasma enhanced chemical vapour deposited silicon–carbon alloys
L. Calcagno, F. Giorgis, A. Makthari, P. Musumeci and F. Pirri 1685

Anomalous electrical behaviour of single-crystal glycine near room temperature
T. C. Chilcott, B. P. Schoenborn, D. W. Cooke and H. G. L. Coster ... 1695

Charge carrier dynamics and the critical vortex velocity in high-T_c superconductors
A. E. Khalil 1703

NUMBERS 11/12—NOVEMBER/DECEMBER

Special Issue: 7th International Workshop on Disordered Systems. Molveno, Italy, March 1999
Guest Editors: A. Fontana and G. Viliani

Preface
A. Fontana and G. Viliani 1711

Obituary 1713

Diffusons, locons and propagons: character of atomic vibrations in amorphous Si
P. B. Allen, J. L. Feldman, J. Fabian and F. Wooten 1715

Novel dynamics of vitreous silica and metallic glass
M. Arai, Y. Inamura and T. Otomo 1733

A high resolution ultraviolet monochromator HIRESUV for the study of disordered materials in the mesoscopic regime
P. Benassi, R. Eramo, V. Mazzacurati and M. Sampoli 1741

Determination of the Ioffe–Regel limit for vibrational excitations in disordered materials
S. N. Taraskin and S. R. Elliott 1747

The vibrational spectrum of amorphous materials obtained by the use of an Anderson-like Hamiltonian
S. N. Taraskin and S. R. Elliott 1755

Are high frequency acoustic modes in glasses dominated by strong scattering or by lifetime broadening?
R. Vacher, E. Courtens and M. Foret 1763

A pedagogical introduction to the replica method for glasses
G. Parisi 1775

Breakdown of Debye–Stokes–Einstein and Stokes–Einstein relations in glass-forming liquids: an explanation from the coupling model
K. L. Ngai 1783

Equations of structural relaxation
M. Fuchs and Th. Voigtmann 1799

The Potts frustrated model: relations with glasses
G. Franzese and A. Coniglio 1807

Mode coupling theory for molecular liquids: what can we learn from a system of hard ellipsoids?
M. Letz and R. Schilling 1815

Search for a Peierls transport-invariant in the Fermi–Pasta–Ulam chain: a unitary transformation approach
H. Leser and M. Wagner 1821

On dynamical correlations in supercooled liquids
S. Franz, C. Donati, G. Parisi and S. C. Glotzer 1827

Short and intermediate range order in molten trivalent metal halides and oxides
Z. Akdeniz and M. P. Tosi 1833

Generalized transport invariants and the role of Umklapp processes
M. Wagner 1839

Glass transition, freezing and melting of liquids confined in the mesoporous silicate MCM-41
D. Morineau, G. Dosseh, C. Alba-Simionesco and P. Llewellyn 1847

Brillouin scattering from transverse phonons in a molecular liquid and in an ionic salt melt mixture—a comparison
M. Soltwisch, A. Kisliuk, V. Bogdanov, S. Mamedov, D. Stachel and D. Quitmann 1857

Confinement effects in the dynamic properties of liquid polymers within porous media: a light scattering study
V. Crupi, D. Majolino, G. Maisano, P. Migliardo and V. Venuti 1871

EG–PEO and EG homologue–PEO systems: an example of different solute–solvent interactions depending on monomer end groups
V. Crupi, A. Faraone, G. Maisano, D. Majolino, P. Migliardo, V. Venuti and V. Villari 1877

Inelastic neutron scattering experiments on polyurethane: microscopic origin of the β relaxational process
C. Levelut, Y. Scheyer, J. Pelous and D. Durand 1881

Elastic behaviour and low-temperature specific heat of linear and reticulated amorphous polymers
G. D'Angelo, G. Tripodo, G. Carini, A. Bartolotta, G. Salvato and V. P. Privalko 1889

Time-resolved optical Kerr effect in *m*-toluidine: a test of mode-coupling theory predictions
R. Torre, M. Ricci, P. Bartolini, C. Dreyfus and R. M. Pick 1897

Diffusion and relaxations in liquid and amorphous metals
C. Gaukel, M. Kluge and H. R. Schober 1907

Hopping dynamics in random energy landscapes: an effective medium approach
P. Maass, B. Rinn and W. Schirmacher 1915

Evidence of glassy behaviour of water molecules in confined states
P. Gallo, M. Rovere, M. A. Ricci, C. Hartnig and E. Spohr 1923

Transfer dynamics of the two-site prototype polaron model
U. Herfort and M. Wagner 1931

Critical behaviour in the fracture of disordered media
G. Caldarelli, C. Castellano and A. Petri 1939

Excess wing and high frequency dynamics in plastic crystals
P. Lunkenheimer, R. Brand, U. Schneider and A. Loidl 1945

Temperature and pressure dependences of the relaxation dynamics of supercooled systems explored by dielectric spectroscopy
S. Corezzi, M. Lucchesi, P. A. Rolla, S. Capaccioli, G. Gallone and M. Paluch 1953

Energy and entropy barriers of two-level systems in argon clusters: an energy landscape approach
O. Pilla, G. Viliani and C. Brangian 1965

Transitions between metastable states in silica clusters
C. Brangian, O. Pilla and G. Viliani 1971

Structure and dynamics of sodium disilicate
J. Horbach and W. Kob 1981

A model for the long time dynamics in a simple glass: off-equilibrium properties
L. Angelani, G. Parisi, G. Ruocco and G. Viliani 1987

Short-time rotational relaxation in supercooled and glassy *o*-terphenyl: a nonlinear electron spin resonance study by using molecular probes with different symmetries
L. Andreozzi, M. Faetti, M. Hvala and M. Giordano 1993

Optically induced variations of the electrical conductivity of a water in oil microemulsion near the percolation threshold
F. Bloisi and L. Vicari 2005

Acoustic nature of the boson peak in vitreous silica
C. Masciovecchio, V. Mazzacurati, G. Monaco, G. Ruocco, T. Scopigno, F. Sette, P. Benassi, A. Cunsolo, A. Fontana, M. Krisch, A. Mermet, M. Montagna, F. Rossi, M. Sampoli, G. Signorelli and R. Verbeni 2013

Intensity sharing between Brillouin and Umklapp scattering in glasses
U. Buchenau, A. Wischnewski, M. Monkenbusch and W. Schmidt 2021

Inelastic X-ray scattering determination of the dynamic structure factor of liquid lithium
T. Scopigno, U. Balucani, A. Cunsolo, C. Masciovecchio, G. Ruocco and F. Sette 2027

On the shape of the dynamic structure factor in glasses
P. Benassi, V. Mazzacurati and M. Sampoli 2037

Observation of propagating acoustic vibrational modes in glasses by Raman scattering
E. Duval, L. Saviot, N. Surovtsev, J. Wiedersich and A. J. Dianoux 2051

Low-frequency Raman scattering in glasses: thermal treatments and viscosity
C. Chemarin, B. Champagnon and E. Duval 2057

Li diffusion and fullerene dynamics in lithium fulleride $Li_{12}C_{60}$ from inelastic neutron scattering experiments
L. Cristofolini, G. Cicognani, A. J. Dianoux, P. Facci, M. P. Fontana and M. Ricco 2065

Low-temperature optical and thermal properties of AgI-based phosphate glasses
A. Fontana, F. Rossi, C. Armellini, G. D'Angelo, G. Tripodo and A. Bartolotta 2073

Low-frequency light scattering in silica xerogels: influence of the heat treatment
F. Terki, J.-N. Pilliez, T. Woignier, J. Pelous, A. Fontana, F. Rossi, M. Montagna, M. Ferrari, G. Cicognani and A. J. Dianoux 2081

Low frequency dynamics of silica xerogel porous system
G. Cicognani, A. J. Dianoux, A. Fontana, F. Rossi, M. Montagna, T. Scopigno, J. Pelous, F. Terki, J. N. Pilliez and T. Woignier 2091

Optical properties and structural characterization of erbium-activated SiO_2–TiO_2 planar waveguides prepared by rf sputtering
C. Tosello, S. Ronchin, E. Moser, M. Montagna, P. Mazzoldi, F. Gonella, M. Ferrari, C. Duverger, R. Belli and G. Battaglin 2103

Phase transitions and undercooling in confined gallium
A. Di Cicco, S. Fusari and S. Stizza 2113

Low energy excess magnetic states in terbium metaphosphate glass
T. Brennan, G. A. Saunders, B. D. R. Rainford, R. Eccleston, G. Carini, G. D'Angelo and G. Tripodo 2121

Modelling structural stability under irradiation
P. M. Ossi 2129

Luminescence spectroscopy of hydrogen-associated defects in hydrogen-loaded and heated germanosilicate optical fibres
F. Goutaland, H. Kuswanto, A. Yahya, A. Boukenter and Y. Ouerdane 2137

X-ray photoemission study of Pr^{3+} in zinc borate glasses
G. Speranza, M. Ferrari and M. Bettinelli 2145

Supersonic seeded beams of thiophene based oligomers for preparing films of controlled quality
T. Toccoli, M. van Opbergen, A. Boschetti, G. Ciullo, S. Ronchin and S. Iannotta 2157

Subject index 2167

Index of authors (with titles of papers) 2173
